Write one strategic objective would you say is fundamental to the success of your organization?

- Why is it necessary and important in the bigger picture?
- What has stopped your organization from doing it?

If a solution is intended to “fix” what’s wrong, then framing “what’s wrong” in different ways can lead to different solutions

Strategic Objective

Dig Deeper

- ▶ Organic Growth
- ▶ Segmentation / Diversification
- ▶ Bundling and Unbundling
- ▶ Value Propositions
- ▶ Sales Force / Marketing

- ▶ Lower cost of Sales
- ▶ Lower cost of production
- ▶ Better Estimates.
- ▶ Eliminate inefficiencies
- ▶ Highly productive and safe crews

- ▶ Better Financial systems
- ▶ Cash Flows
- ▶ Better collections
- ▶ Lower insurance cost, EMR rating, Work comp claims

- ▶ Aligning culture to strategy
- ▶ Who gets rewarded , on what and why
- ▶ What level of organization is needed to support our strategies
- ▶ What comes first , As C level suite where do we place our efforts
- ▶ How do we prioritize our time & investment
- ▶ What’s our investment thesis
- ▶ What research is needed to get the answers

Priority

If a solution is intended to “fix” what’s wrong, then framing “what’s wrong” in different ways can lead to different solutions

Strategic Objective

Dig Deeper

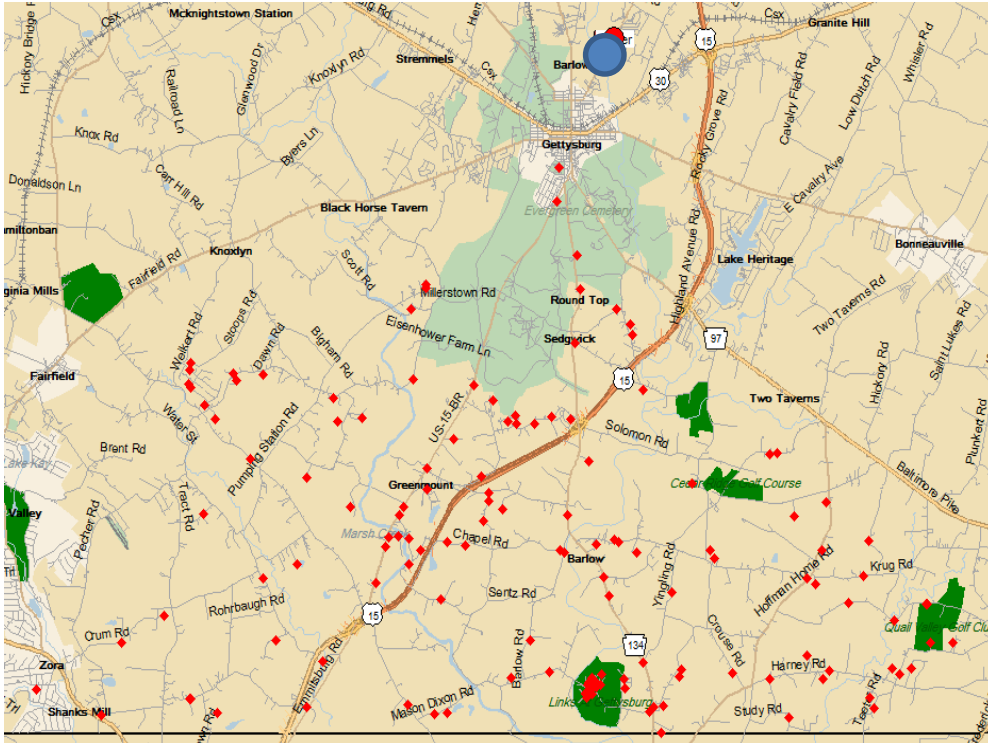

Priority

Case Study: UPS

120 deliveries

What is the most cost effective way to serve these customers?

**Approximate age of the Earth in seconds:
145,065,600,000,000,000**

Number of ways to deliver 120 stops:

**6,689,502,913,449,135,000,000,000,000,000,000,000,000,000,000,
000,000,000,000,000,000,000,000,000,000,000,000,000,000,
000,000,000,000,000,000,000,000,000,000,000,000,000,000,
000,000,000,000,000,000,000,000,000,000,000,000,000,000,
000,000,000,000,000,000,000,000,000,000,000,000,000,000**

How Analytics Transformed Operations at UPS

The Logistical Complexities at UPS

55,000
package car drivers
in US alone

106,000
drivers globally

16 million
packages daily

**One driver = trillions of ways
to run delivery routes**

Shaving just one mile/ driver
= **\$50 million**
savings a year

The challenge: Arriving at the
most optimal route for drivers

Business Benefits of Analytics

Reduction of
85 million ↓
miles driven/ year

8 million fewer
gallons of fuel used

Reduction in **engine idling**
time by 10 million
minutes

Reduction in **carbon**
footprint by 6,500
metric tons

**Analytics has changed the way
UPS functions**
