

CHAPTER NEWS

CHAPTERS COMMITTEE CHAIR'S LETTER

KEITH HARRISON

Fall is rapidly approaching. As eager as we all were to see summer come, I feel safe saying we are all just as eager to see those 105°F (41°C) days disappear.

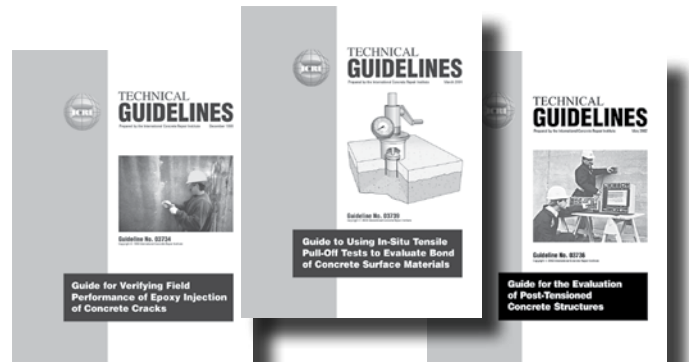

With fall, of course, comes the ICRI Fall Convention to be held October 12-14, 2011, in Cincinnati, OH. There will be a lot of interesting Technical Sessions on water and wastewater treatment plant repairs.

Our Inter-Chapter Luncheon topic this fall will be the “Overview of ICRI Technical Guidelines” that you have heard so much about in the past few months. Rick Edelson will be handling the presentation that he and Jim MacDonald have put together.

This presentation will be made available to chapters and will be a great tool for our local groups, as well as at the national level, for promoting ICRI and its Technical Guidelines.

Following the presentation, we will go directly into the Chapters Committee meeting and cover our chapter business.

This is a luncheon you will not want to miss. Hope to see you there!
